Index to Volume 12 (1992)

No 1 (January) pp 1–64
No 2 (April) pp 64–128
No 3 (July) pp 129–216
No 4 (October) pp 217–288

Author Index

Abbott, S.G. and Denton, M.F.
Catalytic combustion of solvent vapours from adhesives, 211
Adams, R.D., Coppendale, J., Mallick, V. and Al-Hamdan, H.
The effect of temperature on the strength of adhesive joints, 185
Al-Hamdan, H. *see* Adams, R.D., 185
Andrews, P.R. *see* Ellis, M.B.D., 95
Arrowsmith, D.J., Moth, D.A. and Rose, S.P.
The enhancement of adhesive joint strength by extending the surface of anodized aluminium, 67
Atkins, R.W. *see* Tod, D.A., 159

Baker, A.A. and Chester, R.J.
Minimum surface treatments for adhesively bonded repairs, 73
Banerjee, A.N. *see* Chattopadhyay, S., 105
Bhattacharya, T., Ghosh, T.B. and De, S.K.
Durability studies of aluminium/aluminium joints bonded by chlorobutyl rubber–carboxylated nitrile rubber and epicholohydrin rubber–carboxylated nitrile rubber blends, 233
Bishopp, J.A.
The chemistry and properties of a new generation of toughened epoxy matrices, 178
Bjorneklett, A., Halbo, L. and Kristiansen, H.
Thermal conductivity of epoxy adhesives filled with silver particles, 99
Blackley, D.C. *see* Comyn, J., 263
Bolon, R.B. *see* Stein, J., 111
Bowditch, M.R., Hiscock, D. and Moth, D.A.
The role of the substrate in the hydrolytic stability of adhesive joints, 164

Carciello, N.R. *see* Sugama, T., 27
Černilec, N. *see* Malavašič, T., 38
Chattopadhyay, S. and Banerjee, A.N.
Adhesion study of vinylchloride–vinylacetate–maleic acid terpolymer/nitrocellulose blends, 105
Cherry, B.W. and Ye, Y.Q.
The behaviour of high-temperature anaerobic adhesives, 206
Chester, R.J. *see* Baker, A.A., 73
Chui, W.K. and Jones, R.
A numerical study of adhesively bonded lap joints, 219
Cohen, Y. *see* Scherf, J., 251
Comyn, J.
Contact angles and adhesive bonding, 145
Comyn, J., Blackley, D.C. and Harding, L.M.
Surface analysis of emulsion adhesives by fast atom bombardment mass spectrometry and X-ray photoelectron spectroscopy, 263
Conley, K. *see* Ritter, J.E., 245
Coppendale, J. *see* Adams, R.D., 185
Crompton, J.S. *see* Ellis, M.B.D., 95
Crouch, I.G. *see* Stuart, T.P., 3

De, S.K. *see* Bhattacharya, T., 233
De Neve, B. and Shanahan, M.E.R.
Effects of humidity on an epoxy adhesive, 191
Denton, M.F. *see* Abbott, S.G., 211
Dodiuk, H. *see* Wasserman, S., 257

Edde, F. and Verreman, Y.
On the fracture parameters in a clamped cracked lap shear adhesive joint, 43
Ellis, M.B.D., Andrews, P.R. and Crompton, J.S.
In situ *straining of epoxy adhesives*, 95
Enyiegbulam, M.E.
Acid-base interactions: adhesion and the elimination of cavities in the production of synthetic marble, 117

Fay, P.A. *see* Harris, J.A., 9

Ghosh, T.B. *see* Bhattacharya, T., 233
Grenoble, M.E. *see* Stein, J., 111

Halbo, L. *see* Bjorneklett, A., 99
Harding, L.M. *see* Comyn, J., 263
Harris, J.A. and Fay, P.A.
Fatigue life evaluation of structural adhesives for automotive applications, 9
Harvey, W.J. *see* Su, N., 85
Hiscock, D. *see* Bowditch, M.R., 164
Howlonia, B.P.
Comparison of peel test and holographic NDT method for water ingress into metal joints, 241
Hutchinson, A.R. *see* Lees, D.E., 197

Jones, R. *see* Chui, W.K., 219

Kamusewitz, H. *see* Possart, W., 49
Kemp, T.J. *see* Wilford, A., 171
Kenig, S. *see* Wasserman, S., 257

Kotzev, D. and Kotzev, V.
Novel uses of cyanoacrylate adhesives — polycyanoacrylate foams, 150
Kotzev, V. *see* Kotzev, D., 150
Kristiansen, H. *see* Bjorneklett, A., 99
Kumar, D. *see* Narain, N.P., 271

Lamm, F.P. *see* Pike, R.A., 227
Lee, T.C.P. *see* Wilford, A., 171
Lees, D.E. and Hutchinson, A.R.
Mechanical characteristics of some cold-cured structural adhesives, 197
Lin, T.D. *see* Wightman, J.P., 133
Ludbrook, B.D. and Whitwood, R.J.
The use of thermal analysis to investigate the cure of reactive adhesives, 138

Mackie, R.I. *see* Su, N., 85
Malavašič, T., Černilec, N., Mirčeva, A. and Osredkar, U.
Synthesis and adhesive properties of some polyurethane dispersions, 38
Mallick, V. *see* Adams, R.D., 185
Mirčeva, A. *see* Malavašič, T., 38
Miura, M. *see* Sugama, T., 27
Moth, D.A. *see* Arrowsmith, D.J., 67
Moth, D.A. *see* Bowditch, M.R., 164

Narain, N.P. and Kumar, D.
Adhesives produced by reactions of phosphorus halides with phenols and bisphenols, 271

Ong, C.-L. and Shen, S.B.
The reinforcing effect of composite patch repairs on metallic aircraft structures, 19
Ong, C.-L., Shu, W.-Y. and Shen, S.B.
The evaluation of non-tank surface treatments for aluminium bonding repairs, 79
Osredkar, U. *see* Malavašič, T., 38

Patarini, V.M. *see* Pike, R.A., 227
Pike, R.A., Patarini, V.M., Zatorski, R. and Lamm, F.P.
Plasma-sprayed coatings as adherend surface pretreatments, 227
Porta, M.L. *see* Stein, J., 111
Possart, W. and Kamusewitz, H.
Some thermodynamic considerations concerning the usual interpretation of wetting on solids, 49

Ritter, J.E. and Conley, K.
Moisture-assisted crack propagation at polymer/glass interfaces, 245
Robertson, C.D. *see* Stein, J., 111
Rose, S.P. *see* Arrowsmith, D.J., 67

Scherf, J., Cohen, Y. and Wagner, H.D.
Interfacial strength measurements in poly(p-phenylene benzobisthiazole)/epoxy composites, 251
Shanahan, M.E.R. *see* De Neve, B., 191
Shaw, S.J. *see* Tod, D.A., 159
Shen, S.B. *see* Ong, C.-L., 19
Shen, S.B. *see* Ong, C.-L., 79
Shu, W.-Y. *see* Ong, C.-L., 79
Stein, J., Bolon, R.B., Porta, M.L., Robertson, C.D. and Grenoble, M.E.
Scanning and environmental electron microscopy studies of silicone release coatings, 111
Stuart, T.P. and Crouch, I.G.
The design, testing and evaluation of adhesively bonded, interlocking, tapered joints between thick aluminium alloy plates, 3
Su, N., Mackie, R.I. and Harvey, W.J.
The effects of ageing and environment on the fatigue life of adhesive joints, 85
Sugama, T., Carciello, N.R. and Miura, M.
Adhesion of crystalline polyphenyletheretherketone (PEEK) in metal-to-metal joints, 27

Tod, D.A., Atkins, R.W. and Shaw, S.J.
Use of primers to enhance adhesive bonds, 159

Verreman, Y. *see* Edde, F., 43

Wagner, H.D. *see* Scherf, J., 251
Wasserman, S., Dodiuk, H. and Kenig, S.
Shear creep behaviour of elastomeric adhesives, 257
Webster, H.F. *see* Wightman, J.P., 133
Whitwood, R.J. *see* Ludbrook, B.D., 138
Wightman, J.P., Lin, T.D. and Webster, H.F.
Surface chemical aspects of polymer/metal adhesion, 133
Wilford, A., Lee, T.C.P. and Kemp, T.J.
Phase separation of polysulphide polymers in epoxy adhesives, 171

Ye, Y.Q. *see* Cherry, B.W., 206

Zatorski, R. *see* Pike, R.A., 227

Keyword Index

Acid-base interactions
Synthetic marble, Cavities, 117
Adherend/adhesive interface
Adhesive-bonded joints, Water exposure, 164
Adhesive-bonded joints
Joint design, Interlock joints, 3
Structural adhesives, Fatigue behaviour, 9
Polyphenyletheretherketone, Steels, 27
Cracked lap shear specimen, Adhesive stresses, 43
Joint strength, Durability, 159
Water exposure, Adherend/adhesive interface, 164
Surface pretreatment, Plasma-sprayed coatings, 227
Strength loss, Water ingress, 241
Adhesive bonding
Composite patches, Fatigue testing, 19
Aluminium, Durability, 67
Surface treatment, Primer, 73
Field repair, Surface treatment, 79
Adhesively-bonded joints
Joint strength, Temperature, 185
Adhesive joints
Durability, Fatigue, 85
Adhesives
Lap-shear test, Load-carrying capacity, 219
Crack growth, Environmental exposure, 245
Phosphorus halides, Phenols, 271
Adhesive stresses
Adhesive-bonded joints, Cracked lap shear specimen, 43
Aluminium
Adhesive bonding, Durability, 67
Anaerobic adhesives
Cure mechanism, Bond strength, 206

Blend synergy
Toughened epoxies, Polyurethane modifier, 178
Bond strength
Anaerobic adhesives, Cure mechanism, 206
Bulk properties
Environmental ageing, Joint strength, 191

Carboxylated nitrile rubber
Chlorobutyl rubber, Epichlorohydrin rubber, 233
Catalytic combustion
Solvent vapours, Footwear, 211
Cavities
Synthetic marble, Acid-base interactions, 117
Chlorobutyl rubber
Carboxylated nitrile rubber, Epichlorohydrin rubber, 233
Coatings
Surface treatment, Polymer blends, 105

Composite patches
Adhesive bonding, Fatigue testing, 19
Contact angles
Thermodynamics, Surface free energies, 145
Cracked lap shear specimen
Adhesive-bonded joints, Adhesive stresses, 43
Crack growth
Adhesives, Environmental exposure, 245
Creep
Elastomeric adhesives, Shear loading, 257
Cross-linking
Polyurethane dispersions, Formulation, 38
Cure mechanism
Anaerobic adhesives, Bond strength, 206

Degree of cure
Thermal analysis, Glass transition temperature, 138
Droplet micropull-out test
Interfacial shear strength, Fragmentation test, 251
Durability
Adhesive bonding, Aluminium, 67
Adhesive joints, Fatigue, 85
Adhesive-bonded joints, Joint strength, 159

Elastomeric adhesives
Creep, Shear loading, 257
Emulsion adhesives
Surface analysis, Fast atom bombardment mass spectrometry, 253
Environmental ageing
Bulk properties, Joint strength, 191
Environmental exposure
Adhesives, Crack growth, 245
Environmental scanning electron microscropy
Silicone release coatings, UV curable silicones, 111
Epichlorohydrin rubber
Chlorobutyl rubber, Carboxylated nitrile rubber, 233
Epoxy
Polysulphide, Phase separation, 171

Fast atom bombardment mass spectrometry
Emulsion adhesives, Surface analysis, 263
Fatigue
Adhesive joints, Durability, 85
Fatigue behaviour
Structural adhesives, Adhesive-bonded joints, 9
Fatigue testing
Adhesive bonding, Composite patches, 19
Field repair
Adhesive bonding, Surface treatment, 79
Filler particles
Fracture stress, *In situ* straining, 95
Foaming optimization
Polycyanoacrylates, Foams, 150
Foams
Polycyanoacrylates, Foaming optimization, 150
Footwear
Solvent vapours, Catalytic combustion, 211
Formulation
Polyurethane dispersions, Cross-linking, 38
Fracture stress
Filler particles, *In situ* straining, 95
Fragmentation test
Interfacial shear strength, Fragmentation test, 251

Glass transition temperature
Thermal analysis, Degree of cure, 138

***In situ* straining**
Filler particles, Fracture stress, 95
Interfacial shear strength
Droplet micropull-out test, Fragmentation, 251
Interfacial tension
Wetting, Thermodynamics, 49
Interlock joints
Adhesive-bonded joints, Joint design, 3

Joint design
Adhesive-bonded joints, Interlock joints, 3
Joint strength
Adhesive-bonded joints, Durability, 159
Adhesively-bonded joints, Temperature, 185
Environmental ageing, Bulk properties, 191

Lap-shear test
Adhesives, Load-carrying capacity, 219
Load-carrying capacity
Adhesives, Lap-shear test, 219

Mechanical characterization
Temperature, Moisture, 197
Metal/polymer composite
Silver-filled epoxy adhesive, Thermal conductivity, 99
Moisture
Mechanical characterization, Temperature, 197

Phase separation
Epoxy, Polysulphide, 171
Phenols
Adhesives, Phosphorus halides, 271
Phosphorus halides
Adhesives, Phenols, 271
Plasma-sprayed coatings
Adhesive-bonded joints, Surface pretreatment, 227
Polycyanoacrylates
Foams, Foaming optimization, 150
Polymer blends
Coatings, Surface treatment, 105
Polyphenyletheretherketone
Adhesive-bonded joints, Steels, 27
Polysulphide
Epoxy, Phase separation, 171
Polyurethane dispersions
Formulation, Cross-linking, 38
Polyurethane modifier
Toughened epoxies, Blend synergy, 178
Primer
Adhesive bonding, Surface treatment, 73

Segregation
Thin polymer films, Surface pretreatment, 133
Shear loading
Elastomeric adhesives, Creep, 257
Silicone release coatings
Environmental scanning electron microscopy, UV curable silicones, 111
Silver-filled epoxy adhesive
Metal/polymer composite, Thermal conductivity, 99
Solvent vapours
Catalytic combustion, Footwear, 211
Steels
Adhesive-bonded joints, Polyphenyletheretherketone, 27
Strength loss
Adhesive-bonded joints, Water ingress, 241
Structural adhesives
Adhesive-bonded joints, Fatigue behaviour, 9
Surface analysis
Emulsion adhesives, Fast atom bombardment mass spectrometry, 263
Surface free energies
Thermodynamics, Contact angles, 145

Surface pretreatment
Thin polymer films, Segregation, 133
Adhesive-bonded joints, Plasma-sprayed coatings, 227
Surface treatment
Adhesive bonding, Primer, 73
Adhesive bonding, Field repair, 79
Coatings, Polymer blends, 105
Synthetic marble
Acid-base interactions, Cavities, 117

Temperature
Adhesively-bonded joints, Joint strength, 185
Mechanical characterization, Moisture, 197
Thermal analysis
Degree of cure, Glass transition temperature, 138
Thermal conductivity
Metal/polymer composite, Silver-filled epoxy adhesive, 99
Thermodynamics
Wetting, Interfacial tension, 49
Surface free energies, Contact angles, 145
Thin polymer films
Surface pretreatment, Segregation, 133
Toughened epoxies
Polyurethane modifier, Blend synergy, 178

UV curable silicones
Silicone release coatings, Environmental scanning electron microscopy, 111

Water exposure
Adhesive-bonded joints, Adherend/adhesive interface, 164
Water ingress
Adhesive-bonded joints, Strength loss, 241
Wetting
Thermodynamics, Interfacial tension, 49
